

Product Data Sheet  
Atlaset III-D Series  
October 2006

### Product Description

Atlaset III-D Series Inks are great for fast dry workhouse systems. They have been a proven performer on virtually all paper and board stocks including matte and dull. Unlike most fast dry inks, you will notice a surprisingly high level of gloss and pigmentation. Water fighting vehicles keep the plate dry for faster turn-around.

Atlaset is a sheetfed offset ink designed for trouble-free printing under most printing conditions ranging from low to high speed presses, small to large presses and a variety of printing papers.

Atlaset inks provide outstanding gloss, fast drying, sharp dots, and excellent traps.

Atlaset inks are offered as a ®PANTONE line of mixing colors. Atlaset conforms to ®PANTONE color standards.

Atlaset will stay open overnight and can be left on press for extended period of time.

Atlaset inks are considered wax free and laser safe.

Atlaset inks can be aqueous and UV coated. However, it is recommended for colors such as Reflex Blue, Rhodamine Red, Purple, Violet, and Warm Red are made in our “Imitation” formula. These colors will burn out when UV or aqueous coating is applied. Consult ink supplier for more information.
